

Analyze credit risk for any company in the world

Moody's flagship solution for accelerated financial risk insights and early warning signals, EDF¹-X, applies our time-tested credit models to assess financial resilience analytics/insights for 520+ million companies globally using the best data available. Even in the absence of timely financial statement information, EDF-X still produces reliable risk measures leveraging Moody's curated trove of alternative data, powered by sophisticated machine learning techniques. Now you can score your entire portfolio – rated and unrated, public and private firms globally – with greater speed and accuracy.

EDF-X scores the world's largest credit database

EDF-X takes credit risk signals to the next level

Industry-Leading Data + Risk Models

Combined capabilities of our extensive company database and award-winning models provide accelerated financial risk insights for 520+ million pre-scored companies ranging from small family-owned businesses to large global enterprises.

Simple Execution

Choose from 100+ company identifiers to get the best credit assessment for any name given the financial data available. You can also use your own data in a simplified global template to analyse your company. The EDF-X web platform and API helps streamline public and private portfolio processes and create automated workflows.

MOODY'S

Moody's Best Models

Easily score entire portfolios without having to make modeling decisions. EDF-X selects the best probability of default (PD) model based on company data, payment data, or user provided financials, market condition inputs, credit cycle and/or scenario adjustments.

Early Detection of Risk

Early warning signals for every company help you spot emerging risks and opportunities across your portfolio with enough time to take action. Historical trends and risk comparable available for 300,000+ peer groups.

Intuitive interface provides customized views and targeted alerts for a range of business and credit decisions

- Loss Given Default, plus instrument pricing
- Climate risk impact
- News-based credit sentiment
- Firmographic & ownership details, plus parent-support framework
- Trade payment behavior insights
- Advanced entity and bond screening features

MOODY'S

With economic uncertainty and rising corporate default risk, early warning signals are increasingly important

The former “category killer” took a negative turn in 2019 when it announced financial losses for the first time in 27 years. It’s been on a roller coaster ride ever since with declining sales, management changes, store closures and layoffs. The company publicly warned of [bankruptcy](#) in January 2023 saying it may not have enough cash after a hard-hit [holiday season](#). The company launched stock offerings in February and March but could not raise the capital needed.

Recognized for cutting-edge credit risk innovations and analytics
